# WALL TILES

## 3D ACOUSTIC WALL TILES

Dynamic, versatile and expressive. 14x8 3D acoustic wall tiles will offer functional dimensionality to any vertical surface no matter the size.

Our standard 597mm X 597mm tiles can be arranged and configured uniformly in a single direction, vertically or horizontally, in alternating directions or totally random to create expressive visual interest to your space.

Designed with parametric blades configured to form 3 dimensional organic shapes, sound is trapped, deflected and diffused between the individual blades maximising acoustic performance and enhancing visual impact.
