**MuffleStick** is our own branded self-adhesive acoustic panel. MuffleStick features Class A sound absorption capabilities. This high-performance sound absorbing panel aids in the reduction of echo and reverberation – contributing to a clear, balanced, and enjoyable sound environment. The installation of this acoustic panel couldn't be easier with its simple peel and stick application – making it ideal for an easy DIY project!

### Advantages:

- Made from high-quality melamine foam
- Class A sound absorption
- Available in several fabric types
- Wide range of colours to choose from
- Self-adhesive backing for an easy peel and stick application

# Product Specifications

MuffleStick is made from a high-quality and lightweight melamine foam with a self-adhesive backing.

## Fire

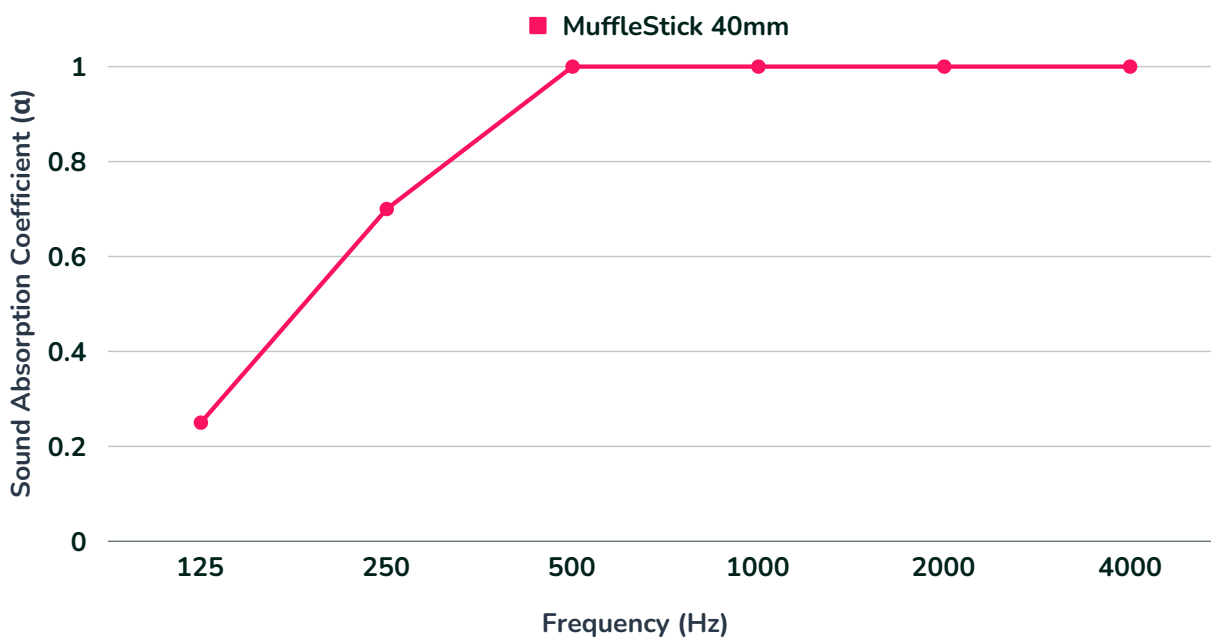

MuffleStick core board has been tested and offers Class O fire rating to BS476: Part 9 and 7, BS 6853 Annex D.8.4, and BS 6853 Annex B2 Fabric facing complies with:  
Cara: Class 1 to BS476: Part 7 and EN1350-1 Class B, s1, d0

## Weight

MuffleStick panels have a density of 9kgm<sup>-3</sup>.  
All volumetric mass densities are given as approximations.

## Acoustic Performance

MuffleStick is made from a high performing acoustic foam which offers 'Class A' | sound absorption  
**Noise Reduction Coefficient** | 0.95 (95%) BS EN ISO 345:2003

# Product Dimensions

MuffleStick acoustic panels are available in 3 different shape options – square, rectangle, and circle. Each shape is available in a variety of sizes to suit your space perfectly.

**Rectangle**

1200 x 1500 x 40 (mm)  
1200 x 1800 x 40 (mm)  
1200 x 2000 x 40 (mm)  
1200 x 2400 x 40 (mm)  
1200 x 600 x 40 (mm)  
1200 x 900 x 40 (mm)

**Circle**

Ø 800 x 40 (mm)  
Ø 1000 x 40 (mm)  
Ø 1200 x 40 (mm)

**Square**

600 x 600 x 40 (mm)  
800 x 800 x 40 (mm)  
900 x 900 x 40 (mm)  
1000 x 1000 x 40 (mm)  
1200 x 1200 x 40 (mm)

# Installation

MuffleStick panels are suitable for fixing to a variety of solid surfaces including concrete, plasterboard, and block work. Before panel application, wallpaper should be removed and any emulsion paint should be brushed off with a stiff brush.

The application area needs to be completely dry and free from dents, bumps or imperfections – the surface should be 100% flat. Any signs of dampness or unevenness should be eliminated before installation. A minimum of 60mm should ideally be left between each panel.

We recommend a test adhesion be complete before applying all panels. Ideally, the panels should be installed in room temperatures between 5°C and 22°C.

## Step One

Measure the area you'd like to place the panel and mark the wall.

## Step Two

Handle panel with clean and dry hands (ensure panel is also clean)

## Step Three

Remove the backing and peel away the entirety of the yellow sheet

## Step Four

Place the panel on the wall (Application is permanent) and push firmly against the wall across the whole surface to complete the installation

For ceiling application, a silicone adhesive must be used.

# Colours

MuffleStick is available in a broad range of colours. The Cara fabric range is available for the square and rectangle panels only.

# Product Care

## Delivery, Storage & Handling

MuffleStick panels should not be exposed to excessive moisture when storing or handling. When storing, lay the panels flat and keep away from dirt or damp.

## After Care

Once installed, any light dirt marks can be removed using a proprietary carpet spot cleaner. Ensure to test the carpet cleaner on a smaller area of the panel to ensure the fabric is not adversely affected.
